Introduction

What is a wordstore?

- Wordstores are files that hold the questions for an exercise.
- Each type of exercise, Reading, Spelling and Numbers, has its own type of wordstore, so you can only use Reading wordstores for Reading exercises and so on.
- When a student starts an exercise, the software randomly selects 10 questions from the wordstore.
- If there are more than 10 questions in a wordstore, each exercise will most likely present a different set of questions. Even with only 10 questions in the file, they will always be presented in a different order.
- For multiple-choice exercises, the incorrect options (known as distractors) are selected from the same wordstore as the questions. Distractors may also differ for each exercise, depending on the distractor settings.
- **The alphabet reading and spelling wordstores have sound files associated with each entry in the files.** You can record your own sound files should you wish for any entry in any reading or spelling wordstore.
- All reading and spelling wordstores have a 'Listen' option after each question is completed with synthesised sound.

For further information, please see the *Wordstores* chapter in your User Guide (on your installation CD in printable format) or take a look at the Tour in the software - available when you sign on as Master and by clicking on Help.

Defaults

The very first time you use the software, you are set up to use a default workplan (see description below and the Workplan section on page 27).

When you stop using this workplan, you will be set up to use the default wordstore, *default.sto*.

This file is located in the *Wordstores/* folder. There is one of these for each purpose, reading, spelling and numbers. You will find them listed within the individual sections.

After starting to use the software, the default wordstore is only used if the software cannot find the current wordstore. Consequently, you may want to change the contents of your default wordstore so that it is at a more suitable level for most of your students.

To change the default wordstore and workplan

To change this:

1. Click on **Ability** on the Windows task bar at the top of the program screen.
2. Select the **Default data levels** option.
3. Select the Year you would like for the default wordstore and workplan.
4. Click **OK**
5. If you have SCANiTplus, select the purpose for the workplan, Reading Spelling or Numbers.
6. Click **OK** to save your changes.

New student's wordstore

Once you have signed on as the Master student, you can change the wordstore that new students use initially.

To change the wordstore initially assigned to all new students

If you want new students to start using a different wordstore when they first sign in, you should:

1. Click on **Ability** on the Windows task bar at the top of the program screen.
2. Select the **New student levels** option.
3. Click on **Change** in the Wordstore section.
4. Select the new wordstore.
5. Click **OK** to save your changes.

What is a workplan?

- A workplan is a list of exercises that students can work through without teacher intervention.
- Each exercise is based on a specific wordstore.
- The student must achieve the target set for each task before being automatically moved on to the next task.
- The tasks are performed in the order in which they appear in the workplan's task list.

For further information, please see the *Independent working using workplans* chapter in your User Guide (on your installation CD in printable format).

To stop using the default workplan and select a new workplan:

1. Click on **Change the Workplan or Wordstore**.
2. Click on **Change your Workplan**.

To stop using the default workplan and select a new wordstore:

1. Click on **Change the Workplan or Wordstore**.
2. Click on one of the wordstore option buttons.
3. The program asks you to confirm that you really want to stop using a workplan - click on **Yes**.
The software then automatically selects a default wordstore as above.
3. Click on the button **Change the Workplan or Wordstore** again to select a different workplan or wordstore.

Wordstores

Reading

Default Wordstores

The following files have been copied to *default.sto* in the *Wordstores/Reading/Year?/default* folder where ? = 1,2,3,4, 5 or 6

Year	File name	Description
1	YR Phrases Hi fr1	Short 3 word phrases using the Reception wordbank
2	Y2T1 Phrase Practice	Short practice phrases e.g. Here is the blue cow
3	Y3T1 Money pounds	Money phrases e.g. four pounds exactly

Sciprim	Primary science vocabulary	22

Workplans

Defaults for new students

When a student first starts to use the software, he or she will begin using a default workplan, *default.swp*. The contents of this default workplan depend on which version you have: Reading, Spelling or SCANiTplus. The default workplan is located in the directory *Workplans*.

This is initially set to be at the lowest level, Level 1. There are, however, default workplans set up for all Levels. They are shown in the reading, spelling and numbers wordstore sections. You can change to a different Level default.

To change the default workplan (and wordstore)

To change this:

1. Click on **Ability** on the Windows task bar at the top of the program screen.
2. Select the **Default data levels** option.
3. Select the Year you would like for the default wordstore and workplan.
4. Click **OK**
5. If you have SCANiTplus, select the purpose for the workplan, Reading Spelling or Numbers.
6. Click **OK** to save your changes.

When new students are created, they are automatically assigned to this workplan unless you have changed this option.

To change the workplan initially assigned to all new students

If you want new students to start using a different workplan when they first sign in, you should:

1. Click on **Ability** on the Windows task bar at the top of the program screen.
2. Select the **New student levels** option.
3. Click on **Change** in the Workplans section.
4. Select the new workplan..
5. Click **OK** to save your changes.

Reading

Default workplans

There is one default workplan *default.swp* for reading, located in the *Workplan/* folder.

You can select a different default workplan from those located in the *Workplan/Year ?/default* folder, where ? = 1,2,3,4, 5 or 6.

Year	Description	No of Tasks
1	All exercises for Year 1 Revision and Terms 1 to 3	89
2	All exercises for Year 2 Revision and Terms 1 to 3	32
3	All exercises for Y3 Revision and Terms 1 to 3	37
4	All reading exercises for Year 4	23
5	All reading exercises for Year 5	56
6	Reading long phrases and sentences to improve reading speed, fluency and comprehension	9

There is also a workplan called *Instructors.swp* located in the *Workplan* folder. This is intended for training purposes only.
